

## RF-12 - F Connector Tool 12" Total Length - Data Sheet

F Connector Tool - RF-12. Designed to provide easy access to connectors in high-density locations. The head measures 7/16" and is used specifically for "F" connectors and BNC connectors. The socket extends 8" from the handle, the overall length is 12" and the back of the handle has an insertion device to aid in making connections. Works well with both F and BNC connectors.
