## Application Instructions

Made in the  
United States of America

Figure 1. Statguard® Dissipative Neutral Floor Cleaner

### Description

Statguard® Dissipative Neutral Floor Cleaner is formulated to clean floors treated with [Statguard® Dissipative Floor Finish](#) and [Statguard® Low-VOC Dissipative Floor Finish](#), as well as other dissipative or conductive floor tiles and polymer type floor finishes. It is formulated with dissipative agents that will rejuvenate and improve the static dissipative properties of the flooring surface that it is used with without leaving behind residue that can impede dissipation or conductive properties of the flooring material or finish.

### Application

The floor cleaner is more aggressive than a damp mop (diluted finish and water or plain water) and does take the gloss down slightly as it cleans the surface\*. Heavy to moderate traffic floors can be cleaned once a week. Light traffic floors can be cleaned 2 to 3 times a month or as needed.

Testing a small area for compatibility if Statguard® Dissipative Neutral Floor Cleaner has not been used before is recommended.

### EQUIPMENT NEEDED:

- Push broom
- Clean and untreated mop
- Buckets
- Statguard® Dissipative Neutral Floor Cleaner

1. Push broom the surface to be cleaned.
2. For damp mop, dilute Statguard® Dissipative Cleaner 10 to 1 (five (5) gallons of clean water to two (2) quarts of cleaner concentrate). For scrub use 15 to 1.
3. Thoroughly mix the cleaner solution before damp mop application. Use a clean, untreated mop to damp mop the area. Wring out excess fluid and do not flood a treated floor with water. For a scrubbing machine use 175 to 350 RPM with red pad.
4. Allow 30 to 60 minutes drying time before walking on the cleaned area.

Clean floors treated with Statguard® Floor Finish using Statguard® Cleaner. Do not damp mop with high alkaline or high residue cleaner. Using harsh detergents can damage a treated floor's static dissipative properties.
